

Listing of Claims:

1. (Canceled)

2. (Currently Amended) The dispenser (20) as claimed in Claim [1] 8 comprising a second box (25) in said lid (22), said second box (25) comprising an elongated opening (60) [in the] lid compartment (25) for dispensing a second type of towelettes (34), said inner box (26) and said second box (25) occupying, in a superposed position, a space allowing for a closed position of said lid.

3. (Original) The dispenser (20) as claimed in Claim 2 of which said second box is removable.

4. (Original) The dispenser as claimed in Claim 1 in which said means of water tightness is a rim of the lower part (38) which forms three male sides around said container (24) and a rim of the upper part (36) which forms three females sides designed to cover said rim of the lower part (38), a hinge (40) which partly covers a fourth side, said fourth side comprising, in the lower part, a pair of short extensions of said male sides and, in the upper part, a thickening of the wall designed to fill in said short extensions.

5. (Original) The dispenser (20) as claimed in Claim 1 in which said inner box (26) comprises a partition (52) which defines two compartments: a compartment (28) comprising a stack of towelettes of one type and a neighboring compartment (32) comprising a stack of towelettes of a complementary type, each of said compartments having an elongated opening (29, 33) for removing said towelettes.

6. (Canceled)

7. (Canceled)

8. (Currently Amended) A dispenser comprising: a container and a lid attached to said container; a removable inner box inverted in said container and defining a compartment for holding a stack of towelettes, said inner box having a bottom and a serrated opening made in said bottom for the removal of said towelettes, a watertight means of attaching said container and said lid in a closed position, the opening of said lid and the passage of said towelettes through said serrated opening making it possible to use towelettes kept in a controlled environment by pulling them, said removable inner box designed to make possible a single loading of said stacks of said towelettes and a [The dispenser as claimed in Claim 7, in addition comprising] means of sealing said removable

inner box [(26)] in place, the top of said inner box [(26)] being sealed against the bottom of said container [(24)].

9. (Original) The dispenser as claimed in Claim 8 in which said means of sealing comprise the use of a microwave oven which makes possible the fusion of said top against said bottom.

10. (Currently Amended) The dispenser as claimed in Claim [6] 8 in which a reversible cartridge [(62)] of a lesser thickness than the thickness of said lid is designed to be placed on either side in said lid.

11. Canceled

12. Canceled

13. (New) A dispenser comprising: a container and a lid attached to said container; a removable inner box inverted in said container and defining a first compartment for holding a stack of moist towelettes and a second compartment for holding a stack of dry towelettes, said inner box having a bottom and a first opening made in said bottom for the removal of said moist towelettes and a second opening made in said bottom for the removal of said dry
